AIRSTREAMS

The Brick Airstream

by Bard Fuller

In 1989 US Brick Inc of Owosso, MI, promoted their new innovative ½ inch thick brick panels by displaying them on the only known brick Airstream. By laminating their thin brick product, they showed how it could be used on curved surfaces.

They used a 1975 31' Airstream and adhered 500 sq ft of this brick veneer which added some 3000 pounds to the trailer. The trailer also featured over \$11,000 of oak trim millwork around the windows done by the Precision Millwork Corp of Cherry Hill, NJ. The brick trailer was seen at trade shows in St. Louis, New Orleans and Las Vegas. ~
