The Airstream Clipper was Airstream's first travel trailer to feature the "silver bullet" design – rolled off the line in 1936.

Father's Day at Timberline lodge, Mt. Hood. O'Neill's & us actually drove up towing our campers! I don't think I would do that again. The exterior of the building was used in *The Shining*. The interior is a CCC work of art every American should see.

O'Neill's & Leslie's at Wilson Ranch Retreat, 15809 Butte Creek Road, Fossil, OR. Ann Leslie tells, "Dry camping for the first time for either of us. We wound around mountain roads, been through a cattle drive with honest to God cowboys and girls, visited a fossil bed, and ended with a steak dinner at the ranch." The Drag's, # 4556, are pictured next to Leslie's.

No trip like this happens without some excitement. Bud Lanoue and Dave O'Neill work on getting Bud back on the road after an accident July 10 in Ogden, Utah. Bud made it to International before we (Leslie's) did!
