How Much Water Can A Zip-Dee Awning Hold?

I always feel nervous when Joel puts our camper awning out or back in. We have a 2023 International FBT with an automatic awning system, and from day one, it's been finicky. Going out but not retracting, getting stuck part way, not wanting to go out, not wanting to come in. I just don't use it. I don't want the stress. Joel, on the other hand, maybe because he has confidence that he can fix whatever goes wrong, uses it almost every time we camp. (I guess I should mention that with the help of factory service on the phone, he did finally get to the bottom of the problem. I'm just still nervous about it.)

A few weeks ago, we were at our full-time campsite, raking leaves, putting up our canopy, organizing the shed, just getting everything ready for summer. We had taken 2 vehicles, and Joel left before me. When I finished up with my chores, I did all the things I normally do to secure the

## FROM YOUR PRESIDENT

Above, the Region 2 Rally, May 1-4, 2025 at The Grange Fairground in Centre Hall, PA.

## President's Message

If you didn't make it to the Region 2 Rally last month you missed a great rally. The Washington DC Unit sponsored the rally and did a wonderful job. Next years Region 2 Rally dates and location were announced a few weeks ago. Next year brings us to the Pocono Raceway where we will be camping in the infield of the racetrack. The dates are May 14-17. All sites will be full hookup. More information and the Jotform for signing up will be released shortly. I hope you can make plans to attend.

There's a lot happening in the Club this summer. The State Rally is right around the corner and time is running out to sign up. I hope to see many of you there this year.

I want to make sure everyone knows about a unique opportunity that's available to every member. You may or may not be aware of the fundraising effort taking place right now for the new History Center and Member Clubhouse at our headquarters in Jackson Center. EC Member Jenny Schnettler is raising funds for the project by selling engraved paving bricks that will be used in what Jenny call the "Pathway to Progress." Members can purchase a paver and add custom text( names, BRN, clipart). A 4"x8" paver can be purchased for \$125. There are other sizes and combinations that can be customized as well. Here's the link to buy your brick <https://www.fundraisingbrick.com/online-orders/aci/>

The International Rally in York is coming quickly also. There are still opportunities to volunteer at the rally. If you'd like to volunteer please reach out to me and I can put you in contact with the right people.

That's all for now

Matt

Region 2 Rally Wrap-Up: Centre Hall Shines for Airstreamers

The 2025 Region 2 Rally in Centre Hall, Pennsylvania is now a fond memory—and what a wonderful gathering it was! A hearty group of Airstreamers from across Region 2 converged at the Centre County Grange Fairgrounds for several days of fun, fellowship, and all things Airstream, and AI-Mon-O was proud to be part of it.

From the rolling hills of central Pennsylvania to the welcoming local community, Centre Hall provided the perfect backdrop for a rally full of activities. Attendees enjoyed a variety of excursions, including visits to Penn’s Cave, local artisan shops, and scenic drives through Amish country. Back at the fairgrounds, there were informative seminars, a Kentucky Derby themed party, and plenty of opportunities to reconnect with old friends—and make new ones.

Evening programs featured horse racing fun with plenty of laughter, while daily meals and happy hours made it easy to unwind and share stories from the road. The sense of community was unmistakable, and it was especially heartwarming to see members from different units working together and helping one another throughout the rally.

A special thank-you goes to the Region 2 leadership and volunteers who organized such a smooth and engaging event. AI-Mon-O members were active participants, and several lent a hand behind the scenes—your spirit of service truly reflects the best of our club!

If you attended, we hope you returned home with great memories and perhaps a few new ideas for future rallies. If not, we encourage you to consider joining us next year—you won’t want to miss the fun, the friendships, or the chance to be part of something truly special in Region 2.

Until then, safe travels, and we’ll see you down the road!

campsite before I went home. Later that night I had an uneasy feeling that I had forgotten to turn the water off at the red head. But after some careful thought I remembered I had. I locked he camper and the shed. It’s all Good.

Two days later I return and as I’m backing my car into the campsite, I see those blue, green and white stripes in my rearview mirror. I forgot to retract the awning! And It’s been raining for days! My stomach sinks. I’m panicked. I have that awful feeling you get after nearly avoiding a car accident or you when have a deer tumble over your car at three a.m. What do I do? The arms haven’t collapsed, both arms of the awning are still holding. Holding so much rainwater! I’ve got to get the water off of it, so I run to the shed to find our broom. I’ll use it to push the water up and off the fabric. With shaky fingers I finally get the shed’s lock combination right but don’t see the broom. (Ugh! I reorganized the shed and it’s not where it normally is).

I see an ax....no that’s not a good idea. A rake, a shovel, I consider these too but then I spot the broom.

The fabric of the awning is so bowed, so stretched, so full of rainwater that I can’t believe it hasn’t collapsed. From underneath the awning I press up on the fabric with the broom, but I can’t push up high enough to displace any of the water. Now what do I to do? What button should I push? I don’t know, I don’t ever use this awning. I want to call Joel for advice, but I don’t want to have to tell him what I’ve done. (Lately we’ve been having so many things go wrong. Little things, but a lot of things.

MAY 14-17, 2026 PIT STOP IN POCONO - REGION 2 RALLY

*\*DETAILS COMING SOON!*

We'd even just that morning had a conversation about how we needed a break...for something to go our way...get out of this run of bad luck.)

VP-----

I have to call him. As usual...he is calm, and kind...and he tells me to push the button that reads tilt front. I wonder if I should do this from inside the camper. Will I become trapped inside if the awning arms break? If I stay outside, will I have enough time to push the button, slam the door, duck under the awning arm and then run away should the whole arm snap off above my head? I decide to stay outside. The tilt rushes all the water forward, and it drained, and drained and drained and drained. I swear there was enough water up there to fill an entire queen size waterbed. The hole that was created in our compacted gravel driveway by this waterfall was over two feet wide and two inches deep. I wish that I had a video to share. It was incredible. But the most incredible thing...is that the awning retracted as it should!

We're hoping our luck has changed for good.

(Fact check...a queen waterbed holds 160 gallons of water. So... I may have exaggerated)
