

SmartGlow Fuse - it glows when it blows.

Do you enjoy looking for blown fuses in dimly lit fuse boxes or under dash boards? Do you look forward to building up the strength in your fingers by pulling out every fuse in the fuse panel?

If not you should try SmartGlow Fuses by Littelfuse. These automotive type fuses (ATO, Mini, Maxi and glass tube) feature an indicator light that glows when the fuse is blown, which saves time when trying to trouble shoot an open circuit.

They snap into place easily and are color coded by amp rating for easy identification.

We carry the SmartGlow Fuse in our Service Store and they are also available at Ace Hardware, Advance Auto, AutoZone, J.C. Whitney & Co. and Pep Boy Stores.

They are more expensive than the regular types of fuses but certainly make finding a blown fuse a no brainer.
