

I am always looking for new products that would be of value to you, our Airstream customer. I have been testing GLARE on several Airstream trailers as well as my car and truck and believe this product will be a winner. It provides an out of this world shine and protection from bird droppings and bugs, etc. We recently shipped a trailer to California for a customer that we had applied GLARE. It arrived with bugs on the front as well as road grime, they both came off with little effort. Give it a try, I believe that you will like it too.

Airstream part number: 28437W     \$34.95     available at online store  
www.airstream.com or call 937-596-6111 ext. 7400 or 7418

**GLARE PROFESSIONAL POLISH** Provides protection from the Sun, UV Rays, Acid Rain, Road tar and road chemicals, Bird droppings, Salt Water, Paint Strippers, Eggs, Dirt, Hard Water, ETC.

This product provides the highest shine available with a three dimensional depth of gloss. This is brand new technology in paint appearance and protection. GLARE PROFESSIONAL POLISH is a non-stick, high gloss, all-weather, temperatureflexible sealant containing a new type of proprietary chemical formulation called Glassplexin.

GLARE was developed by on- staff chemists who have over 150 years of paintspecific chemical experience combined. GLARE PROFESSIONAL POLISH

represents the very latest in paint appearance and protection technology. It contains no waxes, polymers, or resins because those type of ingredients and chemicals have very low melting points, do not filter out UV rays, and do not hold up to regular washing. GLARE PROFESSIONAL POLISH will bond to your vehicle's paint through a covalent chemical bond, which is not possible with any other product currently available in the world's market.
