

Rock Tamers

Protecting your Airstream trailer

You are planning on doing some winter traveling or going where the roads are not the best kept and want to provide protection from grit/gravel and other road debris. The first step would be to make sure that your tow vehicle is equipped with quality mud flaps, the longer the better. The wheels of your tow vehicle will still be picking and throwing stones, salt/road grit back toward your shiny Airstream. You may want to consider additional protection by adding additional mud flaps between your tow vehicle and trailer. You will want something with a large coverage area, looks good and easy to install and remove. One such system is made by a company called ROCK TAMERS™; here are some of the details:

Rock Tamers 2.5" Hub Mudflap System Matte Black/Stainless Steel Trim Plates

ROCK TAMERS™ are an "Adjustable and Removable" Mudflap System designed to provide the ultimate protection for your Airstream from damage caused by rocks and road debris.

This system is easy to attach or remove from any standard 2.5" ball mount. Just remove your ball mount and slide it through the Rock Tamer mounting bracket.

The overall width is adjustable and easily fine-tuned to fit any small, full size or dually truck.

The mud flap height is adjustable to maintain consistent ground clearance when towing various loads. Each rubber flap is 24x24" and 3/8" thick and can easily be cut to the size that works for the height of your tow vehicle.

This system is used by many of Airstream's transport drivers when they are doing single pull deliveries to the dealerships. You can buy the Rock Tamers from numerous online sources (eBay,etrailer.com) or if you want a set with the Airstream stain- less steel logo, you can purchase from Airstream's store (937-596-6111 ext.7400). They are currently selling for around \$300.
