

Trailer Wheel Bearings

QUESTION: Is there any recommendation as to when trailer wheel bearings should be re-greased? Mileage or time?

ANSWER: Every 10,000 miles or at least once per year. Here is an excellent reference article: <http://sierranevadaairstreams.org/owners-guide/maintaining/bearings/index.html>. A great source for seals, bearings, races, brakes etc. : <http://www.etrailer.com/>. The page for the seals is: http://www.etrailer.com/Merchant2/merchant.mvc?Screen=CTGY&Store_Code=E&Category_Code=Bearings. Etrailer.com also has some great videos.
