

Carry-Bikes® by Fiamma®

Airstream has teamed up with Fiamma to co-develop a unique bike carrier specifically customized to satisfy the exacting demands of the Airstream travel trailer owner. Fiamma is a leading manufacturer of RV accessories with global sales and a worldwide reputation for premium quality products and service.

Airstream Carry-Bikes have been designed to address the needs of the following model lines, in all lengths and floor plans: International- from 2001 model year and newer, Flying Cloud – from 2009 model year and newer, and Safari - from 1997 model year. The bike racks also will fit most models (excluding Classic trailers) from 1994.

In addition, Airstream and Fiamma have developed a removable version of the Carry-Bike for fitment inside the Eddie Bauer line of travel trailers, which feature the rear sports hatch and configurable furniture. This version of the Carry-Bike also holds 2 bicycles.

Manufactured from lightweight extruded aluminum, the Carry-Bike is both lightweight (21lbs for the bumper mount and 9 1/2 lbs for the interior mount) and strong, with a carrying capacity of 75 lbs., or 35 kg. suitable for 2 bicycles. The Carry-Bike mounts on the rear of the Airstream trailer, allowing continued access to integrated rear bumper storage. Bikes mount securely on the unit and loading and unloading is quick and easy. They will be sold by Airstream Dealer Network or contact Airstream Store at 937-596-6111 ext.7400 or 7418 for details.

1 The 209397-01 model fits Eddie Bauer units and installs inside attaching to the floor

2 The 209397 model fits International & Flying Cloud models and attaches outside over the bumper
