

Sealant Products

I hope that everyone had a great summer and are in the process of getting ready for winter. It certainly has been an interesting summer to say the least; a lot of great events took place and some unfortunate weather events have been the center of attention. With the coming of the winter months comes winter maintenance, whether storing your coach for the winter or heading south for warmer climates, the sealant used to water proofing your RV needs inspected.

There are many good sealant products on the market that can be used to seal the exterior seams of your Airstream . I have put together a list of the sealants we currently use during the manufacturing process; most of these products can be purchased through our on-line store www.airstream.com or through your Airstream dealer. The majority of the sealans are available in a tube while the Acryl-R sealant is available only in a 16 oz. can.
